

## CAPITAL PARTNERS

# BBH Luxembourg Funds - BBH Short Duration

## Quarterly Update | 3Q 2025

### 3Q Highlights

- The Fund outperformed its benchmark during the quarter, with selection and sector effects driving performance.
- Credit dynamics remained broadly healthy, supported by low default rates and steady fundamentals across most sectors.
- While there have been idiosyncratic corporate defaults and signs of stress for some consumers, credit losses remain low and manageable for companies and securitization structures. With credit spreads near multidecade lows, disciplined security selection and a focus on durability are essential to capturing incremental yield while managing downside risk.

### PERFORMANCE

Past performance does not predict future results

Fund/benchmark	Annual returns									
	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015
Class A	6.15%	7.20%	-1.46%	1.30%	3.18%	4.09%	1.72%	1.99%	2.50%	-0.58%
Bloomberg U.S. 1-3 Year Treasury Bond Index	4.03%	4.29%	-3.82%	-0.60%	3.16%	3.59%	1.56%	0.42%	0.86%	0.56%

### AS OF 30 SEPTEMBER 2025

Fund/benchmark	Average annual total returns						
	3 mo.	YTD	1 yr.	3 yr.	5 yr.	10 yr.	Since inception
BBH Short Duration - Class A Shares	1.38%	4.00%	5.03%	6.21%	3.67%	3.07%	2.54%
Bloomberg U.S. 1-3 Year Treasury Bond Index	1.12%	3.99%	3.89%	4.36%	1.53%	1.67%	1.48%

Class A Inception: 31/01/2013

Class A Ongoing Annual Charges: 0.50%

Class I shares redeemed 06/09/2023

Returns of less than one year are not annualized.

The ongoing charges may vary from year to year. While the Prospectus indicates an ability by the Investment Manager or Principal Distributor to charge a maximum of 3% of the subscription price upon entry / 1% of the total redemption proceeds, we have not and do not plan to impose this charge. Performance has been calculated in USD.

Sources: Bloomberg and BBH & Co.

## Market environment

U.S. fixed income markets posted solid returns during third quarter 2025 as interest rates declined across the curve, the Federal Reserve (the Fed) cut rates, and credit risk spreads narrowed further. All mainstream indexes had positive total returns and excess returns to credit.

Credit risk spreads were lower across all major indexes, and, for many indexes, quarter-end index spreads declined to levels last experienced in the late 1990s. The Bloomberg U.S. Corporate Index's quarter-end spread hit its lowest month-end level since May 1998, while month-end spreads of double-B and single-B corporate bonds were lower at quarter-end only four times over the past 30 years. Structural changes to the composition of broad investment grade and high-yield corporate bond indexes may provide reasons for these low spread levels. Looking forward from these spread levels, expected credit returns are meager and negative in many instances.

Unsurprisingly, the BBH Valuation Framework<sup>1</sup> indicates a very low level of appropriately valued opportunities. The Framework showed that 3% of investment grade corporate bonds, 44% of corporate loans, 24% of high-yield corporate bonds, and no segment of the agency mortgage-backed securities (MBS) market met our criteria for purchase at quarter-end. Spreads of collateralized loan obligation (CLO) debt and many nontraditional asset-backed security (ABS) subsectors sit at the narrowest ends of their historic ranges. However, there remain opportunities in pockets of the credit markets. For example, there are opportunities for incremental yield in shorter maturity, high-grade corporate bonds. Debt of smaller issuers also screens favorably within the high-yield bond and loan markets. Several nontraditional ABS subsectors screen attractively, and spreads of many commercial mortgage-backed security (CMBS) subsectors are at or above the medians of their historical ranges.

## Valuations

Both supply and demand for credit continue to be very strong. Credit issuance was strong vs. the subdued volumes from last quarter on account of lower interest rates and narrower credit risk spreads. Leveraged corporate

Data reported as of 30 September 2025

**Past performance does not guarantee future results.**

Source: Bloomberg, J.P. Morgan, Palmer Square, ICE, Bank of America, BBH.

Unless otherwise noted Excess Returns are the returns in the excess of duration matched Treasuries.

<sup>1</sup> Excess return computed by BBH as total return less the return of the Bloomberg 3 Month T-Bill Bellwether Index, a proxy for the duration profile of floating-rate leveraged loans and CLO debt.

CLO = Collateralized Loan Obligation; ABS = Asset-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; MBS = Mortgage-Backed Securities; TIPS = Treasury Inflation Protected Securities; EM = Emerging Markets; YE26 = year-end 2026

<sup>1</sup> Our valuation framework is a purely quantitative screen for bonds that may offer excess return potential, primarily from mean reversion in spreads. When the potential excess return is above a specific hurdle rate, we label them "Buys" (others are "Holds" or "Sells"). These ratings are category names, not recommendations, as the valuation framework includes no credit research, a vital second step.

## EXHIBIT II: OUTLOOK BY SECTOR

Sector	Outlook	Positioning
<b>Reserves</b>		
U.S. Treasuries/futures/reserves	Hold when attractive credits unavailable	Held to balance yield curve and duration exposures
Government-related	Unattractive valuations; better opportunities elsewhere	No positions in portfolios
<b>Structured credit</b>		
U.S. MBS	No purchase opportunities in 15- or 30-year pools	No positions in portfolios
RMBS	Continued credit, technical, and valuation concerns	No positions in portfolios
CMBS	Opportunities exist as spreads are near the medians of their historical ranges	Hold issues of SASB and Freddie K securitizations with strong durability and transparency
ABS	Spreads lower but mask variation of opportunities within subsectors	Hold positions across diversified set of nontraditional segments
<b>Corporate credit</b>		
IG corporate bonds	Spreads near historic lows, but some shorter-dated credits screen attractively	Holdings remain in some interest rate sensitive sectors and among certain security selection opportunities
Corporate loans	Opportunities remain in smaller issuers as delinquencies rates stay low	Holdings are diversified and include credits issued by healthcare, banks, airlines, and technology companies
HY corporate bonds	Spreads of "BB" and "B" issues near historical lows, but bonds of some smaller issuers screen favorably	Identified newer opportunities in bonds of technology companies, specialty REITs, and midstream energy companies
<b>Other credit</b>		
Municipal	Valuations of select municipals are attractive for inclusion in taxable portfolios	Holdings include transportation revenue bonds
Emerging markets	Concerns remain about creditor rights in most emerging market countries	No positions in portfolios

As of 30 September 2025. Portfolio holdings and characteristics are subject to change.

MBS = Mortgage-Backed Securities; RMBS = Residential Mortgage-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; ABS = Asset-Backed Securities; IG = Investment Grade; HY = High Yield; SASB = Single Asset, Single Borrower; REIT = Real Estate Investment Trust  
Source: BBH

issuers increasingly chose bond issuance, where volumes were up 6% over last year vs. loans (down 11%). ABS volumes were down 2% from 2024's pace for both traditional and nontraditional subsectors. Nonagency CMBS issuance was robust, with 40% more issuance than last year. Meanwhile, taxable bond fund flows are on pace to have one of the strongest calendar years on record. According to research from Barclays, new issues of investment grade corporate bonds have been approximately four times oversubscribed, with yields driven lower by 0.25% from their announcement to final pricing. Debt markets are open to issuers looking to refinance or raise new capital.

Generous refinancing availability tends to obscure cracks in credit quality; however, there are several trends that suggest the durability of issuers may be tested in the near future. Signs of stress are emerging for lower-income U.S. consumers. These consumers' wages have not kept pace with the inflationary environment of 2022–2023, and high prices continue to impact spending choices. These inflationary dynamics will likely continue over the next 12 months. Prices of nonessential commodities, such as coffee and chocolate, have surged and are shifting consumers' spending patterns toward staple goods. In addition, the price of federal healthcare programs is expected to increase by a median 18% in 2026 with the expiration of Affordable Care Act subsidies. Labor market conditions are a reason for concern, as wage growth has moderated and non-farm payrolls sit near their weakest levels in over 15 years (excluding the months following the onset of COVID-19). There are many loan credit performance indicators that suggest these trends are beginning to impact credit markets. Subprime auto loan default rates are near the higher end of their historical range. Delinquency rates of student loans are elevated after the U.S. government's

forbearance program ended, yet the resumption of student loan payments has not yet appeared to impact delinquency rates of other types of consumer loans.

## Performance

The Fund outperformed its benchmark during the quarter, with selection and sector effects driving performance. The Fund's gain was driven primarily by the decline in interest rates, however, duration effects had no measurable impact on benchmark relative returns during the quarter. Sector effects were driven by positioning within corporate credit to stronger performing segments of the market. From a selection standpoint, positions in corporate bonds of investment grade specialty finance companies and life insurance companies contributed to results. Holdings of high-yield electric utilities also contributed to selection. Investment grade corporate bonds of electric, banking, and food and beverage companies detracted modestly from selection effects.

## Transaction summary

We continued to find durable credits<sup>2</sup> offering attractive value even as valuations reflect a growing belief that the U.S. economy is slowing. The table below summarizes a few notable portfolio additions.

### EXHIBIT IV: TRANSACTION SUMMARY

Obligor	Coupon	Maturity	Yield (YTM)	Rating	Spread	Spread reference	Duration	Sector	Subsector
Avantor	4.63	7/15/2028	5.2	BB+	155	Treasuries	1.9	Corporate bond	Healthcare

CCC & below/NR	0.6	0.0					

**Characteristics**

The Fund's duration was lower than its index, as its duration is managed to preserve capital over shorter term horizons. Over the quarter, holdings of investment grade corporate bonds increased while holdings in reserves decreased amid pockets of opportunity in shorter duration credits. The Fund continued to hold about 5% in high-yield and nonrated credit instruments.

**Concluding remarks**

U.S. business conditions appear stronger. Default rates continue to moderate, delinquency rates and charge-offs of business loans remain subdued, and loan performance within CLOs and business development companies (BDCs) remains strong. There are significant infrastructure capital expenditures being made to support artificial intelligence (AI) ambitions, and they are being financed through the corporate and structured credit markets. With narrow spreads and many of these projects facing uncertain outcomes, strong credit research is paramount for navigating the increasing breadth of opportunities.

Strong credit research is always a necessary ingredient for attaining sustainable credit performance, and it is perhaps no surprise that our credit research identifies many issues that offer attractive yields but do not possess the durability features we seek. However, opportunities remain in every market. In environments of low-risk spreads and sparse opportunity, we believe that the virtues of a bottom-up process build portfolios of durable credits at attractive yields that can prevail in economic uncertainty and benefit our clients' performance journey.

Sincerely,

**Andrew P. Hofer**

Opinions, forecasts, and discussions about investment strategies represent the author's views as of the date of this commentary and are subject to change without notice. References to specific securities, asset classes, and financial markets are for illustrative purposes only and are not intended to be, and should not be interpreted as recommendations.

Purchase and sale information provided should not be considered as a recommendation to purchase or sell a particular security and that there is no assurance, as of the date of publication, that the securities purchased remain in a fund's portfolio or that securities sold have not been repurchased. Nothing contained herein is intended as a recommendation to buy or sell any security, or to invest in any particular country, sector or asset class.

Traditional ABS include prime auto backed loans, credit cards and student loans (FFELP). Non-traditional ABS include ABS backed by other collateral types.

Holdings are subject to change. Totals may not sum due to rounding.

An investment in shares of the Fund and not in any underlying investment owned by the Fund.

Credit Quality letter ratings are provided by Standard and Poor's, Moody's and Fitch and are presented as the higher of the three ratings. When a security is not rated by Standard & Poor's, Moody's or Fitch, the highest credit ratings from DBRS and Kroll may be used. Absent a rating from these agencies, we may display Private Credit Ratings, if permitted by the issuer, which could include ratings from Egan-Jones Ratings Co. Credit ratings reflect the credit quality of the underlying issues in the portfolio and not of the portfolio itself. Issues with credit ratings of BBB or better are considered to be investment grade, with adequate capacity to meet financial commitments. Issues with credit ratings below BBB are considered speculative in nature and are vulnerable to the possibility of issuer failure or business interruption.

Effective duration is a measure of the portfolio's return sensitivity to changes in interest rates. Weighted Average Life of securities excludes US Treasury futures positions.

Yield to Maturity is the rate of return the portfolio would achieve if all purchased bonds and derivatives were held to maturity, assuming all coupon and principal payments are received as scheduled and reinvested at the same yield to maturity. This figure is subject to change and is not meant to represent the yield earned by any particular security. Yield to Maturity is before fees and expenses.

Weighted Average Life of securities excludes US Treasury futures positions.

The Fund is actively managed. Under normal circumstances, the Fund is managed with the intention of maintaining an effective duration of between 80%-120% of the effective duration of Bloomberg US Aggregate Index.

Traditional ABS include prime auto backed loans, credit cards and student loans (FFELP). Non-traditional ABS include ABS backed by other collateral types

## Definitions

Bloomberg US Aggregate Bond Index is a market value-weighted index that tracks the daily price, coupon, pay-downs, and total return performance of fixed-rate, publicly placed, dollar-denominated, and non-convertible investment grade debt issues with at least \$300 million par amount outstanding and with at least one year to final maturity.

An index is not available for direct investment.

"Bloomberg®" and the Bloomberg indexes are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the indexes (collectively, "Bloomberg") and have been licensed for use for certain purposes by Brown Brothers Harriman & Co (BBH). Bloomberg is not affiliated with BBH, and Bloomberg does not approve, endorse, review, or recommend the BBH Luxembourg Funds - BBH Short Duration Fund. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the fund.

## Risks

Investors in the Fund should be able to withstand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The value of portfolios changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments.

Investing in the bond market is subject to certain risks including market, interest-rate, issuer, credit, maturity, call and inflation risk; investments may be worth more or less than the original cost when redeemed. Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

Bond prices may be sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices. Investing in the bond market is subject to certain risks including market, interest-rate, issuer, maturity, call, credit, and investments may be worth more or less than the original cost when redeemed.

Asset-Backed Securities ("ABS") are subject to risks due to defaults by the borrowers; failure of the issuer or servicer to perform; the variability in cash flows due to amortization or acceleration features; changes in interest rates which may influence the prepayments of the underlying securities; misrepresentation of asset quality, value or inadequate controls over disbursements and receipts; and the ABS being structured in ways that give certain investors less credit risk protection than others.

SASB lacks the diversification of a transaction backed by multiple loans since performance is concentrated in one commercial property. SASBs may be less liquid in the secondary market than loans backed by multiple commercial properties.

The Fund also invests in derivative instruments, investments whose values depend on the performance of the underlying security, assets, interest rate, index or currency and entail potentially higher volatility and risk of loss compared to traditional stock or bond investments.

Non-U.S. investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

Adverse exchange rate fluctuations may result in a decrease in return or a loss for shareholders.

Illiquid investments subject the Fund to the risk that it may not be able to sell the investments when desired or at favorable prices.

There is no assurance the Fund will achieve its investment objectives.

The objective of the Fund is to provide investors with maximum total return, consistent with preservation of capital and prudent investment management.

**Complete information on the Fund's risks and expenses can be found in the prospectus.**

The decision to invest in the fund should take into account all the characteristics or objectives of the fund as described in its prospectus.

## Other Important Disclosures

Brown Brothers Harriman & Co. ("BBH") is the promoter and principal distributor of the Funds. Brown Brothers Harriman Mutual Fund Advisory Department (a separately identifiable department of BBH) provides investment advice to the Funds. BBH Luxembourg Funds (the "Company") is a Luxembourg-registered Société d'Investissement à Capital Variable - undertaking for collective investment in transferable securities (SICAV-UCITS) regulated by the Commission de Surveillance du Secteur Financier ("CSSF"), the Luxembourg financial services authority. The SICAV designated FundRock Management Company S.A. to serve as its designated management company in accordance with Chapter 15 of the Luxembourg Law of 17th December 2010; FundRock Management Company S.A. was incorporated on 10 November 2004 for an unlimited duration under the laws of Luxembourg and registered on the official list of Luxembourg management companies.

Either Brown Brothers Harriman or FundRock may terminate arrangements for marketing under the denotification process in the new Cross-border Distribution Directive (DirectiveEU) 2019/1160.
